Sigma Tau Omega-Alpha Kappa Alpha Sorority, Incorporated/Ivy Community Service Foundation of Cary, Inc. Collegiate Scholarship, \$2,500, GRANTED.

Please share your educational and career goals/aspirations and how you plan to move toward greatness:

I was first introduced to the expansive world of science during my freshman year of high school resulting in my future ambitions. My goal is to obtain a Bachelor's Degree in Biology, followed by a terminal degree in the same or a related field. I will use my education to help me pursue my dream of traveling the world while studying the field of science, whether that leads to researching cures for diseases or expanding my knowledge to help others by solving crimes or exposing truths. Achieving this goal will undoubtedly be fulfilling as I believe my ultimate purpose in life is to help others.

As I was selecting universities to attend, I wanted a place that offered many co-curricular activities. UNC-Chapel Hill (UNC) fits that description. UNC has a plethora of ways that the students can enhance their education, including easy access to research for one's desired field. These research opportunities will help me develop a professional identity and connect to my community through my chosen discipline, thereby boosting my resume for graduate school. Also, as a high school student-athlete and student leader, I appreciate the diversity of sports, in addition to the clubs and activities that the university offers. Further, UNC-Chapel Hill has a strong and persistent alumni association, ensuring that students will always have help when they need it for career advancement.

I also hope to feed my desire for curiosity by obtaining my college degree. I am a person who constantly questions and wants to get to the "why". This is one reason I am drawn to my subject matter of Biology. Through science, many questions have been answered, such as how to lengthen a person's lifetime, how to improve their quality of life and ways to cure diseases. All of this has been accomplished because someone was curious. By pursuing a degree in Biology, I can find answers to my questions.

The combination of my passion and diligence fueled by curiosity will push me to complete my degree and get me closer to my ultimate goal of a terminal degree. Whether I encounter challenges or whether I am celebrated, I know I have the resolve to push through to completion. As a goal-oriented person, I'm confident that my determination will help me transform my dreams into realities. I would greatly value and appreciate your financial support, helping me to achieve my academic goals.
